

Living with Migraine Quiz

Take a few moments to answer the questions below.

vyepti[®]
(eptinezumab-jjmr)
100 mg/mL Injection for IV

BACKGROUND

I was diagnosed with migraine about _____ years ago.

I am currently taking _____ for migraine.

- An over-the-counter medication to treat migraine symptoms once they start
 - A prescription medication to help prevent migraine
 - A prescription medication that stops migraine once it starts (acute/rescue medication)
 - No medications
-

About how many migraine days do you typically have in a month? _____ migraine days

About how many days did migraine get in the way of working, taking care of household chores, going to school, or taking part in social and recreational activities? _____ migraine days

Fear (or anxiety) of migraine stops you from making plans:

- Never
 - Sometimes
 - Frequently
 - Always
-

My current preventive migraine medication:

- It is working well for me
- It sometimes works well for me, but not always
- It does not work well enough for me and I'd like to know about other treatment options
- I'm not currently taking a preventive migraine medication

APPROVED USE

VYEPTI is a prescription medicine used for the preventive treatment of migraine in adults.

SELECTED SAFETY INFORMATION

Do not receive VYEPTI if you have a known allergy to eptinezumab-jjmr or its ingredients.

Please see the following additional Important Safety Information.

IMPACT

My migraine symptoms include:

- Sensitivity to light
 - Sensitivity to sound
 - Nausea and/or vomiting
 - Severe and throbbing head pain
 - Other
-

This is what I miss out on because of migraine:

- Going to work and/or being as productive as I would like
 - Getting exercise
 - Taking care of my children or other loved ones
 - Being with family and friends
 - Traveling
 - Taking part in activities such as going to the movies or out to dinner
 - Being spontaneous and making plans
 - Other
-

This is important when thinking about treating your migraine:

- How well it prevents migraine
- How fast it prevents migraine
- How long each dose lasts
- That the treatment is safe and has few side effects
- Helpful resources
- Cost and insurance coverage
- Other

Living with Migraine Quiz

vyepti[®]
(eptinezumab-jjmr)
100 mg/mL Injection for IV

Take these quiz results to your next appointment and ask your healthcare provider if VYEPTI may be right for you.

APPROVED USE

VYEPTI is a prescription medicine used for the preventive treatment of migraine in adults.

IMPORTANT SAFETY INFORMATION

Do not receive VYEPTI if you have a known allergy to eptinezumab-jjmr or its ingredients.

VYEPTI may cause allergic reactions. Call your healthcare provider or get emergency medical help right away if you have any symptoms of an allergic reaction: rash; swelling of your face, lips, tongue, or throat; if you have trouble breathing; hives; or redness in your face.

Before starting VYEPTI, tell your healthcare provider about all your medical conditions, including if you are pregnant or plan to become pregnant, or you are breastfeeding or plan to breastfeed.

Tell your healthcare provider about all the medicines you take, including any prescription and over-the-counter medicines, vitamins, or herbal supplements.

The most common side effects of VYEPTI include stuffy nose and scratchy throat, and allergic reactions.

These are not all the possible side effects of VYEPTI. Tell your healthcare provider if you have any side effect that bothers you or that does not go away.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

For more information, please see the [Prescribing Information](#) and [Patient Information](#), or go to vyepti.com.
