

**vyepti**<sup>®</sup>  
(eptinezumab-jjmr)  
100 mg/mL Injection for IV

VYEPTI is a prescription medicine for the preventive treatment of migraine in adults.

# say yep to the **migraine-free** days you deserve

Proven migraine prevention in clinical studies

*Actor portrayal*

## **IMPORTANT SAFETY INFORMATION**

**Do not receive VYEPTI** if you have a known allergy to eptinezumab-jjmr or its ingredients.

**VYEPTI may cause allergic reactions.** Call your healthcare provider or get emergency medical help right away if you have any symptoms of an allergic reaction: rash; swelling of your face, lips, tongue, or throat; if you have trouble breathing; hives; or redness in your face.

**Please see additional Important Safety Information throughout** and the accompanying **Full Prescribing Information** and **Patient Information**.

**Visit [vyepti.com](https://vyepti.com) for more information.**

# How migraine can impact your life

- Inability to make or stick to plans
- Struggling to keep up with daily responsibilities
- Barely making it through the day, let alone enjoying life

*“Migraine has impacted many aspects of my life. When I was first diagnosed, I lost a lot of friends because they didn’t understand what I was going through.”*

**Nicole,**  
VYEPTI patient

VYEPTI patients featured in this brochure were compensated for their time.

Individual results may vary.

## Do less to manage migraine

VYEPTI helps prevent migraine attacks with **just four 30-minute treatments a year** (every 3 months) given by a healthcare provider.

As an IV infusion, 100% of the medication is delivered into your bloodstream, **so it can get right to work.**

VYEPTI was purposefully designed as an IV infusion to start working fast and **last through month 3** after each infusion.

### IMPORTANT SAFETY INFORMATION

**Before starting VYEPTI**, tell your healthcare provider about all your medical conditions, including if you are pregnant or plan to become pregnant, or you are breastfeeding or plan to breastfeed.

**Please see additional Important Safety Information** throughout.

# People on VYEPTI had **fewer** migraine days

What can people expect  
with VYEPTI?

## In a study of people with chronic migraine

People who averaged 16 migraine days a month receiving VYEPTI\* had an average of

**8 fewer migraine days a month**

vs 6 with placebo, over 3 months

## In a study of people with episodic migraine

People who averaged 9 migraine days a month receiving VYEPTI\* had an average of

**4 fewer migraine days a month**

vs 3 with placebo, over 3 months

\*VYEPTI 100 mg or 300 mg.

*“Having more migraine-free days has made a*

***big difference***

*in my life. I’m able to go to baseball games, concerts, enjoy my family, and little things like reading.”*

**Florian,**  
VYEPTI patient

Individual results may vary.

## IMPORTANT SAFETY INFORMATION

**Tell your healthcare provider** about all the medicines you take, including any prescription and over-the-counter medicines, vitamins, or herbal supplements.

**Please see additional Important Safety Information** throughout.

**In the same chronic migraine study, after receiving VYEPTI for 6 months (2 doses)\***

Up to 40% of people who averaged  
16 migraine days a month achieved

**zero**  
**migraine days**  
**for a month<sup>†</sup> or more**

40% of people on VYEPTI 300 mg, 35% on  
VYEPTI 100 mg, and 22% on placebo had zero  
migraine days for a month or more.

\*This analysis was not part of the original study  
plan and was initiated after the study ended,  
so we cannot make any firm conclusions  
based on these results.

<sup>†</sup>28 days in a row.

In the studies, chronic migraine was defined as  
15 or more headache days per month, with at  
least 8 of those being migraine days; episodic  
migraine was 4–14 headache days per month,  
with 4 being migraine days.

## A treatment with few side effects? **Yep!**

The most common side effects of  
VYEPTI were stuffy nose and scratchy  
throat, and allergic reactions.

**Less than 2% of more than 1100  
people stopped receiving VYEPTI due  
to side effects** in clinical studies.

## Long-term safety

**Side effects were similar** when VYEPTI  
was tested over 2 years in an additional  
study of 128 people with chronic migraine.  
Discontinuation due to side effects was 6%.

## IMPORTANT SAFETY INFORMATION

These are not all the possible side effects of  
VYEPTI. Tell your healthcare provider if you  
have any side effect that bothers you or that  
does not go away.

**Please see additional Important Safety  
Information** throughout.

In a survey of people with chronic migraine\*

## Here's what people said they experienced while living their lives receiving VYEPTI

**80%**   
of people  
**were satisfied**  
with VYEPTI's ability to  
**reduce symptom severity†‡**

\*Most people were receiving VYEPTI for a year or more. All 94 patients surveyed had tried other preventive treatments before receiving VYEPTI and could be on other medications.

†Based on a question asking people how satisfied they are with VYEPTI's ability to impact migraine symptoms, ranging from strongly disagree/disagree to strongly agree/agree. Satisfied includes strongly agree or agree.

‡The survey responses were based on patients' memories of their experiences before starting VYEPTI. Relying on memory of past events may affect the results, and your experience may be different than described.

### Find out how many people also reported:

- Satisfaction with reduction in the frequency of their symptoms
- Improvement in migraine-related brain fog
