

● VYEPTI CONNECT™ Is Your Direct Link to Access Support

Lundbeck is committed to patient access and providing reimbursement information to support access to Lundbeck's products. That is why Lundbeck created VYEPTI CONNECT.

VYEPTI CONNECT is an optional program for patients and providers that provides support throughout the patient journey—from benefits investigations through appeals—as well as information about potential financial assistance that may be available for eligible patients.

VYEPTI CONNECT is there to support you every step of the way

Support throughout the access process to help patients receive their prescribed VYEPTI™ (eptinezumab-jjmr) treatment

*VYEPTI CONNECT resources are only available to patients with a valid prescription for VYEPTI. See full Terms and Conditions for VYEPTI CONNECT at www.vyepticonnect.com.

VYEPTI CONNECT™ Offerings*

Benefits investigation support includes gathering medical coverage requirements, assignment of benefits, and, if applicable, site-of-care requirements of the payer. For assignment of benefits, if Lundbeck's approved specialty pharmacies are not in the payer's network, VYEPTI CONNECT can inquire about the letter of agreement process.

Prior authorization (PA)/medical exception support provides information on determining coverage and completing a PA form for patient access to VYEPTI™ (eptinezumab-jjmr). Once a PA is submitted, VYEPTI CONNECT will monitor and communicate the status of the PA to the office.

Appeals support offers information on health plan coverage denials and responses. In addition, VYEPTI CONNECT will monitor and communicate the status of appeals to the office.

Financial assistance is available for eligible commercially insured patients[†] through the VYEPTI Copay Assistance Program. Patients may pay as little as \$5 per infusion every 3 months for VYEPTI. A maximum annual benefit limit of \$4000 and other restrictions may apply. Patients can check eligibility requirements and enroll in the program at www.VYEPTI.com or by calling 833-4-VYEPTI.
